SDG 3: Good Health and Well-Being

Swami Rama Himalayan University (SRHU) advances SDG 3 through an integrated focus on health research, education, healthcare delivery, collaborations, and community outreach. Research on health and well-being at the University covers communicable and non-communicable diseases, cancer, diabetes, cardiovascular diseases, maternal and child health, mental health, nutrition, antimicrobial resistance, drug discovery, diagnostics, traditional and integrative medicine, yoga-based interventions, and public health systems. Since 2001, the University has recorded 675 publications, with 338 publications during 2021–2025, including 83 publications in 2025. The University also contributes substantially to the health workforce: in 2024–25, 690 of 917 graduating students (75.24%) were from health professions. Through Himalayan Hospital and its academic schools, SRHU provides healthcare services and undertakes collaborations (Local Level- 28, National Level- 31 & Global Level- 5) with government agencies, research institutions, healthcare organisations, and NGOs. These partnerships support rural health camps, disease prevention, vaccination drives, public health initiatives, diagnostics, therapeutics, wellness programmes, and skill development activities.

3.1 Research on Health and Well-being

At **Swami Rama Himalayan University (SRHU)**, research on health and well-being is a cornerstone of its mission to advance scientific knowledge, improve healthcare outcomes, and contribute to sustainable development. This includes advanced research on communicable and non-communicable diseases, cancer, diabetes, cardiovascular diseases, infectious diseases, maternal and child health, mental health, nutrition, antimicrobial resistance, environmental and occupational health, drug discovery and development, molecular diagnostics, traditional and integrative medicine, yoga-based interventions, and public health systems.

Through collaborations with healthcare institutions, research organizations, industry partners, and government agencies, SRHU promotes evidence-based solutions that translate scientific discoveries into improved clinical practice, public health policies, and community healthcare interventions. By integrating research with education, clinical services, and outreach programs, the university continues to generate impactful knowledge that advances Sustainable Development Goal 3 (SDG 3): Good Health and Well-Being**,** while strengthening healthcare delivery and improving the quality of life in the Himalayan region and beyond.

The inception of SDG 3-related research at the University can be traced back to 2001, encompassing 675 publications.

The research profile demonstrates a sustained and increasingly visible contribution to scholarly output. Notably, the period 2021–2025 accounted for 338 publications and 2,155 citations and 6083 views, indicating

a substantial contribution to the overall research portfolio. In 2025 alone, 83 publications were recorded, which accounts for 24.6% of the total research output in the last five years, with 330 citations and 1298 views, reflecting continued research productivity and growing visibility of scholarly work. These indicators highlight the institution's ongoing commitment to research, knowledge dissemination, and academic impact.

Major Community Project undertaken by SRHU in collaboration with our Rural Development Institute for disadvantaged peoples

Women and Child Health

Our maternal and child health initiatives have reached deep into the rural, remote, and mountainous areas of the state, bridging gaps, strengthening health systems, and ensuring access to quality care.

i. **Maternal & Child Health Camps:** To reach underserved areas with limited access and target disadvantaged communities for healthcare, where maternal and infant mortality rates were alarmingly high, comprehensive maternal health camps were organized in villages. A dedicated team comprising a lady doctor, nurse, pharmacist, counsellor, and field supervisor delivered quality care, including health screenings, growth monitoring, blood pressure, blood sugar, and haemoglobin testing, fetal heart sound monitoring via Doppler, and distribution of IFA and calcium tablets. Nutritional and care counselling was also a key part of the support provided. Through 60 camps, 1756 pregnant and lactating women accessed these vital services.

ii. **Special care for high-risk cases:** During the reporting period, 156 high-risk pregnant women received dedicated care, including transportation, diagnostic services, treatment, and nutritional supplements. Women with haemoglobin levels below 7 gm were given nutrition kits, and transportation support was arranged for those facing financial barriers to access higher health facilities. A total of 238 Nutrition Kits were distributed to pregnant and lactating women. ASHAs and field supervisors closely tracked each case throughout pregnancy and postpartum, ensuring timely support and continuous care.

iii. **Village Health, Sanitation and Nutrition Days (VHSNDs):** Village Health, Sanitation, and Nutrition Days, held every Saturday once a month, serve as a vital platform to raise awareness about available health services at the village and higher levels. A special initiative of distributing millet laddoos, started in previous years, continued this year also. Prepared by a local Self-Help Group, these nutritious laddoos are consumed on-site by pregnant and lactating women to ensure adequate intake. This locally-driven approach not only supports maternal health but also empowers women through livelihood opportunities. In total, 1985 pregnant women participated in the VHSNDs during the reporting period.

iv. **Menopause Outreach Clinics:** Menopause marks the natural end of a woman's reproductive years and is often accompanied by a range of physical and emotional changes, especially during the transition phases of perimenopause and postmenopause. For women in rural mountainous areas where seeking health care is still a challenge, these changes can significantly impact quality of life. The organization conducted 10 outreach camps across villages in Yamkeshwar block, Pauri District, reaching 329 women. These camps offered personalized counselling and introduced targeted yoga asanas for different menopausal stages, promoting holistic well-being. Yoga, while not altering hormones, helps manage symptoms by improving fitness, reducing stress, and enhancing emotional balance.

v. **Nutrition Week (1-7 September 2024):** National Nutrition Week 2024 was celebrated during the first week of September with the theme "Nutritious Diets for Everyone." The week aimed to raise awareness about the importance of incorporating nutrition into daily life. Field supervisors, ASHAs, and Anganwadi workers conducted open discussions and counselling sessions to highlight the role of a balanced diet. A key focus was on the health benefits of local millets and their integration into everyday meals to promote better health and well-being.

vi. **General Health Camps:** General Health Camps played a vital role in promoting overall well-being and preventing both communicable and non-communicable diseases in remote tribal communities. Services included growth monitoring, blood pressure measurement, blood sugar and haemoglobin testing. Iron Folic Acid (IFA) and calcium tablets were distributed to women in their antenatal and postnatal stages, along with free medication for those diagnosed with various health conditions. A total of 31 general health camps were conducted during the year, providing medical services to 1,482 beneficiaries.

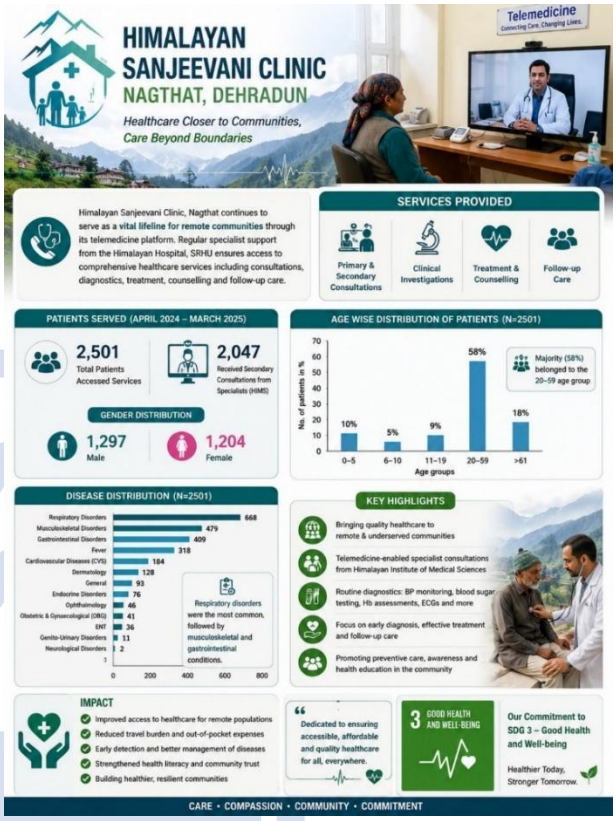

Himalayan Sanjeevani Clinic, Nagthat, Dehradun: Delivering Accessible Healthcare through Telemedicine

The Himalayan Sanjeevani Clinic, Nagthat serves as an important healthcare access point for remote and underserved communities by delivering primary and secondary healthcare services through a telemedicine-enabled model. By connecting patients with specialists from the Himalayan Institute of Medical Sciences

(HIMS), the clinic bridges geographical barriers and ensures timely access to quality medical consultation, diagnosis, treatment, counselling, and follow-up care.

In addition to specialist consultations, the clinic provides a range of essential diagnostic services, including blood pressure monitoring, blood glucose estimation, haemoglobin (Hb) assessment, electrocardiography (ECG), and other routine clinical investigations. This integrated approach enables early diagnosis, effective disease management, and continuity of care for rural populations while reducing the need for long-distance travel to tertiary healthcare facilities.

Major Community Project undertaken for Local Communities

General Health Camps and Community Outreach programmes for Local Communities:

The University regularly organizes health camps in rural and underserved communities to improve access to essential healthcare services and promote preventive health practices. These camps provide beneficiaries with health screening, basic diagnostic investigations, medical consultations, health education, counselling, and referrals for further treatment whenever required. Students actively participate in these initiatives under the guidance of faculty and healthcare professionals, contributing to community mobilization, registration, health awareness activities, preliminary screening, data collection, patient assistance, and health education. Such participation provides students with valuable experiential learning and sensitizes them to community health needs, while strengthening their understanding of preventive and public health practices. Special emphasis is placed on reaching vulnerable and economically disadvantaged populations with limited access to healthcare facilities. Through these initiatives, the University contributes to early detection, disease prevention, health awareness, community engagement, and the promotion of SDG 3: Good Health and Well-being.

Yoga and Wellness Facilities for Mental Health Support for Staff

The School of Yoga Sciences conducts regular yoga sessions and training programmes focusing on yogasanas, pranayama, meditation, and stress management to promote the physical, mental, and emotional well-being of students, faculty members, and staff. The University also periodically organises specialised workshops, including the *Science of Joyful Living*, inspired by the teachings of H.H. Swami Rama. These programmes aim to help individuals explore their inner potential while cultivating joy, creativity, resilience, emotional balance, and a positive approach to life. Collectively, these initiatives contribute to the holistic development, mental well-being, and overall wellness of the University community.

The Swami Rama Centre, situated within the university, provides a serene environment for meditation, reflection, and spiritual enrichment, while preserving and promoting the teachings and philosophy of H.H. Swami Rama. The Centre supports the physical, mental, and emotional well-being of the University community through dedicated spaces for meditation and self-reflection. It also houses a well-equipped library with an extensive collection of books on spirituality, meditation, yoga, health, nutrition, and holistic wellness. These facilities and resources encourage mindfulness, self-awareness, personal growth, and the adoption of a balanced and healthy lifestyle.
