(HCDRL)**

ACTIVITY REPORT

2024-2025

Himalayan Central Diagnostic and Research Laboratory (HCDRL)

The Himalayan Central Diagnostic and Research Laboratory (HCDRL) at the Swami Rama Himalayan University (SRHU), Jolly Grant, Dehradun, stands as a cornerstone of the University's commitment to excellence in healthcare, diagnostics, and translational research. Established as part of the broader vision of the Himalayan Institute Hospital Trust (HIHT) founded in 1989 by H.H. Dr. Swami Rama, a world-renowned yogi, philosopher, and humanitarian. The HCDRL reflects the founder's enduring mission of integrating education, research, and service for the benefit of humanity.

Conceptualization and Foundation

The concept of the Central Research Laboratory (CRL) at SRHU evolved around the HCDRL functioning under the Himalayan Institute of Medical Sciences (HIMS). The vision was to create a unified center that could simultaneously support clinical diagnostics and research-based innovation. The foundation stone for the present facility was laid in 2017, marking a major milestone in SRHU's journey toward scientific advancement.

An area of approximately 5000 square meter was demarcated, and a blueprint was developed for constructing a four-storied facility designed in accordance with best global practices for clinical diagnostics, biosafety, and research infrastructure. The university made an initial investment of about ₹1000 lakh, to create the appropriate infrastructure and through its internal resources, including seed projects sanctioned to various faculty members continues to contribute approximately ₹500 lakh annually to sustain diagnostic operations and foster innovation in emerging research domains.

A notable technological feature of the laboratory is its pneumatic-chute system, enabling the instant transfer of blood samples from different wards of the Himalayan Hospital to the central reference laboratory. This innovation has significantly improved turnaround time and efficiency in diagnostic reporting. The CDRL is NABL accredited and meets all guidelines as released by the MNC from time to time. The SIRO certification issued by the DSIR is applicable to all R & D carried out in various labs.

Genesis and Evolution

The roots of the HCDRL trace back to the establishment of HIHT in 1989, under the visionary leadership of H.H. Dr. Swami Rama, who sought to make quality healthcare and education accessible to the people of Uttarakhand and in the greater Himalayan region. In 1994, HIHT established the Himalayan Hospital- a multi-specialty teaching unit that integrated modern medical science with traditional healing systems. During the same period, the Central Diagnostic and Research Laboratory was initiated as a reference laboratory within the hospital premises.

This pioneering initiative was led by Dr. Diorio and Mrs. Diorio, whose efforts laid the foundation for core laboratory disciplines. Dr. Diorio established the Biochemistry Laboratory, while Mrs. Diorio set up the Microbiology Laboratory. Over the years, the facility expanded its scope to become an essential support system for clinical diagnostics, research investigations, and medical education.

Under the able leadership of Dr. Vinita Kalra, followed by Dr. Dushyant Singh Gaur, the laboratory functioned within the hospital building from 1994 to 2016, offering high-quality diagnostic services and serving as a teaching and research resource for the Himalayan Institute of Medical Sciences and Himalayan College of Nursing.

Expansion and Modernization

With the establishment of Swami Rama Himalayan University (SRHU) in 2013, and the continued expansion of its healthcare and academic ecosystem, the need for a more advanced, centralized diagnostic and research facility became evident. Accordingly, in 2016, a dedicated site was allocated for constructing the Himalayan Central Diagnostic and Research Laboratory (HCDRL), symbolizing a new era of integrated research and diagnostics.

On 13th November 2017, the newly constructed HCDRL building was inaugurated. This multi-story, state-of-the-art complex houses advanced infrastructure and equipment across four specialized floors:

- Ground Floor: OPD & IPD Sample Collection and Procedures
- 1st Floor: Biochemistry Laboratories

- 2nd Floor: Microbiology Laboratories
- 3rd Floor: Hematology and Clinical Pathology Laboratories
- 4th Floor: Histopathology and Cytopathology Laboratories

This restructuring transformed HCDRL into a fully operational diagnostic and research hub, catering not only to Himalayan Hospital but also to external healthcare and academic institutions. It is designed to promote interdisciplinary collaboration, clinical investigations, and the training of postgraduate and doctoral scholars in biomedical and allied sciences.

Role and Impact

Today, the HCDRL embodies the integration of clinical excellence, research innovation, and academic rigor. It plays a pivotal role in supporting the diagnostic needs of thousands of patients annually while serving as a center for:

- Advanced biochemical, microbiological, and molecular diagnostics
- Collaborative and translational research across medical and life science domains
- Mentoring and training of postgraduate, doctoral, and postdoctoral researchers
- Continuous quality assurance, standardization, and innovation in diagnostic methodologies

Through its sustained growth and alignment with the guiding philosophy of H.H. Dr. Swami Rama, the HCDRL continues to uphold SRHU's mission of *“Service to Humanity through Science and Compassion.”*

Focus of R & D at CDRL

The R & D in the CDRL primarily comes out from the investigations of patient's samples who visit various OPDs of the attached Himalayan Hospital. Three core areas with well-structure labs and appropriate manpower are stationed at different floors of the CDRL. These are:

1. Biochemistry
2. Microbiology
3. Pathology

The investigations in these laboratories include: Hematology, Clinical Biochemistry, Serology, Virology, Mycology, Bacteriology, Parasitology, Immunology, Histopathology, Cytopathology, Immuno-histochemistry etc. Advanced investigations like Flow cytometry, RT-PCR along with high-tech Molecular Lab tests are done routinely while raising research questions on the samples received in the laboratory. A novel facility as part of CDRL was created for “Plasma Therapy for COVID-19” patients during COVID outbreak. This lab continues to providing learning to the students. The sub-areas under CDRL include: Clinical Biochemistry, Serology, Cytopathology, Histopathology, Hematology, Metabolic disorders, Toxicology, Transfusion Medicine and Cancer.

CDRL is housed with state-of-the art equipment and latest technology for processing and investigating samples of Blood, Urine, Feces, Cerebrospinal fluid (CSF), Peritoneal fluid (Ascitic fluid), Synovial fluid, Sputum & sweat, operated part of the body, Biopsy materials, Bone marrow and Renal calculi. All samples are collected through laid down procedures and investigated for effective diagnosis of diseases and posing research questions.

CDRL with its state-of-the-art laboratories is NABL accredited and a regular quality check is done by the NMC as the third party.
