SYMPOSIUM BRIEF

The Himalayan College of Nursing, Swami Rama Himalayan University, Jolly Grant , Dehradun, is pleased to host a two-days National Symposium on “Progressive clinical Teaching in Nursing”, specifically designed for postgraduate students, Undergraduate students, faculty members, of nursing institutions across the country. Nursing education plays a critical role in preparing competent, compassionate, and skilled health care professionals. With the increasing complexity of patient care and the shift toward competency-based education, nursing faculty must adopt effective clinical teaching and robust assessment strategies. Additionally, nursing students benefit from understanding evaluation processes to become reflective practitioners. A hybrid symposium provides an inclusive platform for both faculty and students to learn, interact, and grow together.

OBJECTIVES OF THE SYMPOSIUM

On completion of the National Symposium, participants will be able to:

1. To explain the concept and importance of progressive clinical teaching in nursing education.
2. To identify different clinical teaching strategies used in modern nursing practice.
3. To examine the use of simulation, bedside teaching and evidence-based learning in clinical education.
4. To promote student-centred and competency-based clinical learning approaches.
5. To evaluate the impact of progressive clinical teaching on patient care quality and professional development.
6. To encourage the integration of technology and innovative methods in nursing clinical education.
